

## 'Blueberry Special'

**Crop specific fertilizer for hard  
water**

### Uses

To provide a complete soluble NPK feed for container or soil grown Blueberries where the irrigation water contains more than 150 ppm bicarbonates.

### Benefits

Solufeed Blueberry Special contains a balance range of macro and micro nutrients to maximise the marketable yield of Blueberries. The feed contains nitrogen of the correct types for the Blueberry plant. Micronutrients are chelated to ensure that they are fully available to the crop. Blueberries like acidic growing conditions. The product dissolves rapidly in water to make an acidic solution which reduces irrigation water pH.
